PROFESSIONAL SUMMARY

Technical Product Manager with 6+ years of experience driving end-to-end Product Lifecycle Management (PLM) for enterprise SaaS, AI, and automation products. Transitioned from an AI developer into product management, combining strong technical expertise with strategic product thinking and data-driven prioritization. At Softspell, driving product strategy, roadmap planning, stakeholder management, and cross-functional collaboration. Skilled in product discovery, AI-powered solutions, API integrations, workflow automation, analytics, conversational AI, and enterprise software platforms.

PROFESSIONAL EXPERIENCE

Technical Product Manager | Softspell.ai | Chennai, India

July 2025 – Present

AI-powered SDLC automation platform for enterprise engineering teams.

- Automated SDLC workflows, reducing team alignment overhead by an estimated 20%.
- Shipped PRDs, user story mapping, and OKRs for developer productivity tools within agile sprints.
- Coordinated engineering and QA teams via cross-functional collaboration to improve first-time release pass rates.
- Architected prompt caching solutions within AI-native workflows, cutting token overhead by an estimated 15%.
- Managed C-suite stakeholders and external vendor relationships to ensure seamless sprint delivery.

Senior Chatbot Developer (AI Chatbot Platform Lead – Twixor) | Inswit | Chennai, India

Apr 2021 – Jul 2025

Low-code enterprise conversational AI platform.

- Developed a low-code AI assistant building module from initial POC to full production, owning its complete lifecycle.
- Architected an NLU conversation engine deployed across 5+ B2B clients to streamline system integrations.
- Integrated LLMs (Claude and Gemini) via prompt engineering to handle out-of-scope user requests.
- Integrated conversational bots with WhatsApp, RCS, and Telegram into a unified messaging ecosystem.
- Built secure chatbot systems for Indian banks to process high-volume financial and transactional queries.

Associate Software Engineer (AI Learning Platform – Learnxa) | PeopleOne Technology Pvt. Ltd. | Chennai, India

Dec

2019 – Jan 2021

AI-powered learning platform with an integrated intelligent chatbot course companion.

- Developed full-stack product features using Ruby on Rails within scheduled client sprints.
- Integrated conversational AI features using IBM Watson and Rasa for personalized user interactions.
- Converted UX requirements into technical designs approved by senior engineering stakeholders.
